

# Darsh Balar

**Full Stack AI Engineer**

## Professional Summary

Full Stack AI Engineer with hands-on experience developing and deploying web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in building RESTful APIs, containerizing applications with Docker, deploying services using Kubernetes, and integrating machine learning models into web applications.

## Technical Skills

- **Languages:** JavaScript (ES6+), Python, SQL
- **Frontend:** React.js, HTML5, CSS3, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, Schema Design, Indexing
- **DevOps:** Docker, Kubernetes, CI/CD
- **Machine Learning:** Scikit-Learn, XGBoost, Model Evaluation, Prediction APIs
- **Tools:** Git, GitHub, Postman, Linux

## Professional Experience

### Full Stack AI Engineer

- Developed responsive web applications using React.js and modern JavaScript.
- Built backend services using Node.js and Express.js, implementing RESTful APIs for frontend and machine learning integration.
- Designed MongoDB schemas and optimized database queries for application data.
- Containerized backend services using Docker and deployed applications on Kubernetes.
- Integrated Scikit-Learn and XGBoost models into web applications through prediction APIs.
- Implemented input validation, error handling, and authentication to improve application reliability.
- Collaborated on application testing, debugging, and deployment workflows.

## Projects

### AI-Powered Prediction Platform

- Built a React.js frontend connected to a Node.js and Express.js backend.
- Used MongoDB to store user information, prediction history, and application data.
- Integrated a trained Scikit-Learn model through a REST API to generate predictions.
- Containerized the application using Docker and configured Kubernetes deployment resources.

## **Machine Learning Analytics System**

- Developed predictive models using Scikit-Learn and XGBoost.
- Evaluated model performance using appropriate classification or regression metrics.
- Exposed model predictions through a backend API for consumption by a web application.

## **Education**

Bachelor's Degree in Computer Science or a related field.
